OVERBUILT IS AN UNDERSTATEMENT.®

**JULY 2009** 

# IT ALL STARTED WITH A DEEP NEED FOR THE MOST RELIABLE VALVES EVER BUILT.

The year was 1893 when the young engineer A.W. Cash was given the toughest challenge of his career:

designing valves for U.S. Navy submarines. With the unforgiving ocean as his ultimate testing "ground", his new valves would require unprecedented levels of performance, reliability and

Patent Pending Multi-Cartridge PRV

dependability. When he later founded the Cash Valve Manufacturing Company, those same standards became its foundation.

And they remain at the heart of today's Cash Acme. We put more into every product we make – more design, more experience, more innovation and cutting-edge manufacturing technologies. Combined with a relentless quality control program that's every bit as unforgiving as A.W.'s ocean.

In short, we don't just build it, we overbuild it. The result is industry-leading products like Heatguard,<sup>®</sup>

our thermostatic mixing valve that allows water to be stored at germ-killing temperatures, while delivering it at a safe 120°F or less. SoloSet® Multi-Cartridge PRV, a cost saving solution

for applications that are subject to wide variations in water demand. Cash-Flo<sup>®</sup> the industry's most maintenance-free backflow preventers. And the SharkBite® Connection System with push-fit and

barb fittings, valves and PEX tubing – the fastest, easiest way from meter to fixtures and the industry's only Total

Rough-In Solution.<sup>™</sup> Just Backflow Preventer a few examples of how we apply deeper thinking to water control technology.

**OVERBUILT IS AN UNDERSTATEMENT.**<sup>®</sup>

# TYPICAL SHARKBITE® APPLICATIONS

#### **NEW CONSTRUCTION** Cut. Push. Done. The SharkBite® Connection

SharkBite® Connection System is the fastest, easiest way to plumb any residential or commercial job.

WET OR DRY REPAIRS There's no faster way to make a repair – wet or dry. You can connect copper, CPVC or PEX pipe in any combination.

#### WATER HEATERS, VALVES AND MORE

Connect a water heater or shower valve. Install a mixing valve or pressure regulator – it's all a breeze with SharkBite® push-fit connections.

#### HYDRONIC HEATING SYSTEMS

Under the floor or behind a wall, a broad range of SharkBite<sup>®</sup> push-fit fittings and PEX products gives you confident connections.

# THE SHARKBITE® CONNECTION SYSTEM

# LIGHTNING FAST. WON'T LET GO.

- Connects copper, CPVC and PEX pipe in any combination.
- No soldering, clamps, unions or glue.
- Certified to 200 psi and 200°F.
- Approved for use underground and behind walls without access panels.
- Certified for potable water and hydronics.
- Integral tube liner for PEX installations.
- Fittings can even be rotated after assembly for easier installation in tight spaces.

Easy to disconnect if needed.

# INSTALLATION AND DISCONNECTION

EASY INSTALLATION

#### FAST DISASSEMBLY

Using the simple disconnect tool, fittings can be easily changed and reused.

# SharkBite<sup>®</sup> Push-Fit Products

SharkBite continues to lead the industry with an expansive line of fittings, valves and other innovative, labor saving products for plumbing projects. SharkBite push-fit fittings are the fastest, easiest way to join copper, CTS CPVC and PEX in any combination. With no soldering or glue. Certified: 200 psi & 200° F (93° C). Use for new installation and repair of potable water distribution systems. See certifications & approvals on page 12.

# Couplings

#### **Straight Couplings**

#### Slip Fittings - For use with copper only

Slip fittings simplify repair by doing the job that two couplings and extra pipe used to do. Only one end of the coupling has a stop, allowing the other end to slide freely over the end of a pipe. The fitting can be released with a disconnect tool and slid back onto the other end of the pipe for successful leak repair.

#### Water Hammer Arrestor

Provides maintenance-free, continuous protection against water hammer. Can be positioned vertically or horizontally and the SharkBite® connectors allow the arrestor to be installed in seconds, even on wet pipe.

| 1/2" Residential | 22630 | - |

# Cash Acme Valves with SharkBite® Connectors

Cash Acme valves with integral or union type SharkBite push-fit connectors offer a tremendous time and labor saving combination for any plumbing application.

#### **Check Valves**

A general purpose, spring loaded check valve that can be installed on copper, CTS CPVC and PEX. The SharkBite® check valve can be installed horizontally or vertically and prevents the reverse flow of water in the supply line.

#### Regulators

The innovative, labor reducing SoloSet® EB-25, the EB-35, and the EB-45 pressure reducing regulators are all available with double union or direct SharkBite® connectors. The EB-25 is set at 45 psi and features a twist cap with a numerical pressure indicator for easy one-man adjustment. The EB-35 is factory set at 45 psi with an adjustment range of 20-90 psi depending on valve size. The EB-45 is factory set at 45 or 60 psi and is adjustable to 10-70 psi.

### **EB-45 Temporary Bypass Kit**

Allows for connection to the water supply before pressure regulator installation. A time saving way to flush out all debris and particles from the plumbing system.

#### SharkBite® Gauges

Use to measure or monitor water conditions in water distribution systems. Quick push-fit installation as temporary (reusable) or permanent device in copper, CTS CPVC and PEX plumbing systems.

#### SharkBite® Thermostatic Valves

Direct or double union SharkBite® push-fit connectors provide a simplified, time and labor saving installation. Heatguard® valves deliver water at a safe 120°F (49°C) or lower from all outlets, while allowing the heater to be set at a germ-killing 140°F (60°C) or higher which aids in preventing the growth of legionella bacteria in the water heater. And the higher tank temperature means hot water demands can be satisfied longer. Every valve is tested for performance and includes a unique adjuster tool that minimizes tampering with the valve setting. Rugged, simple construction incorporates a precision engineered polymer piston and the latest in thermostatic technology.

# SharkBite® PEX Tubing

SharkBite<sup>®</sup> PEX tubing is a cross-linked polyethylene tubing for a wide range of residential and commercial plumbing applications. Manufactured without an oxygen barrier for potable water systems and with an oxygen barrier for radiant floor and hydronic heating applications. The oxygen diffusion barrier applied to the exterior limits oxygen permeation through the tubing wall in hydronic heating applications which prevents corrosion of ferrous metal parts in the heating system. A repeating SharkBite<sup>®</sup> imprint pattern provides a visual aid to determine if the tube has been inserted all the way into the SharkBite<sup>®</sup> Push-Fit Fitting. This feature only works if the tubing is cut between the SharkBite<sup>®</sup> imprint pattern.

Approvals: The SharkBite<sup>®</sup> tubing with and without oxygen barrier is approved for use in all model codes in the US and Canada for use in hydronic and potable water systems and is certified to the following standards: NSF 14/61, NSF P171, ASTM F 876, ASTM F 877, CSA B137.5 and AWWA C904.

#### **PEX With Oxygen Barrier - Straight Lengths and Coils**

Use for radiant floor and hydronic heating applications. The oxygen diffusion barrier is applied to the exterior and limits oxygen permeation through the tubing wall in hydronic heating applications. This prevents corrosion of ferrous metal parts in the heating system.

#### CERTIFICATIONS

The **SharkBite**<sup>®</sup> push-fit fittings have been design certified and listed to ASSE 1061/NSF 61. The **SharkBite**<sup>®</sup> push-fit fittings are listed by IAPMO and are certified for potable and hydronic heating water distribution (note: Glycol mixture for hydronics is not to exceed 50% concentration). The **SharkBite**<sup>®</sup> push-fit fittings have been certified for underground applications and as a manufactured joint without access panels and they meet UPC, IPC and cUPC requirements.

#### Please consult with local plumbing codes concerning specific applications.

The **SharkBite**<sup>®</sup> tubing without oxygen barrier is approved for all model codes in the US and Canada for use in hydronic and potable water systems and is certified to the following standards: NSF 14/61, NSF P171, ASTM F 876, ASTM F 877, CSA B137.5 and AWWA C904.

The **SharkBite**<sup>®</sup> tubing with oxygen barrier is approved for use in all model codes in the US and Canada for use in hydronic and potable water systems and is certified to the following standards: NSF 14/61, NSF P171, ASTM F 876, ASTM F 877, CSA B137.5 and AWWA C904.

Note: The SharkBite® push-fit fittings are not approved for use with chrome-plated pipe.

#### SHARKBITE® PEX INSIDE (ID) AND OUTSIDE DIAMETER (OD)

| Nominal Diameter | OD inches | ID inches |
