

BRADFORD WHITE

# eF SERIES<sup>®</sup>

## ULTRA HIGH EFFICIENCY RESIDENTIAL WATER HEATERS

When the job calls for a powerful high capacity water heater with delivery to spare, the new eF Series<sup>®</sup> Residential Elite from Bradford White is the perfect high output, ultra high efficiency choice. Boasting 95% thermal efficiency and a 120,000 BTU/hr input, the Residential Elite combines the best water heating attributes into one dynamic product that's perfect for the most demanding home applications.

### 95% THERMAL EFFICIENCY

High efficiency means less fuel consumption, greater energy savings and more hot water recovery.

### LOW NO<sub>x</sub> PREMIX POWER BURNER

Maintains extremely low NO<sub>x</sub> emissions while providing a high level of performance and reliability.

### FEDERAL TAX CREDIT\*

Qualifies for the current tax credit of 30% (installation and equipment) up to \$1,500.

### SELF COMPENSATING NEGATIVE PRESSURE COMBUSTION SYSTEM

Automatically increases or decreases fuel flow for optimum performance.

### HONEYWELL INTEGRATED CONTROL

Intelligent, proven design integrates temperature control, diagnostic display and system ignition function into a single control.

### INTELLIGENT DIAGNOSTICS

An easy-to-use LCD display prompts the installer during start-up and provides 10 different diagnostic codes.

### DIRECT SPARK IGNITION

Main burner is lit directly by a high voltage, low current spark from the spark rod to the burner surface for reliable, trouble-free ignitions.

### ULTIMATE INSTALLATION FLEXIBILITY

Power Vent or Power Direct Vent with 2", 3", or 4" vent pipe. 2" or 3" concentric venting capability (only one penetration through a wall or roof) as well as unbalanced venting (air intake doesn't have to be vented on the same external building surface as the exhaust vent).

### SUPPLEMENTAL HEATING CAPABILITY

Two 1" NPT side tappings can easily be connected to space heating, geothermal heating or solar heating applications.
